Orchestry

Governance

Put your Microsoft 365 governance and everyday IT tasks on autopilot.

Define your own Provisioning & Lifecycle Management Policies, role & permission assignment for Microsoft Teams, SharePoint, Team Sites, and Communication Sites specific to your organizational needs.

Set up guardrails for the users by applying the right Policies and governance standards to the right Workspace templates and existing content.
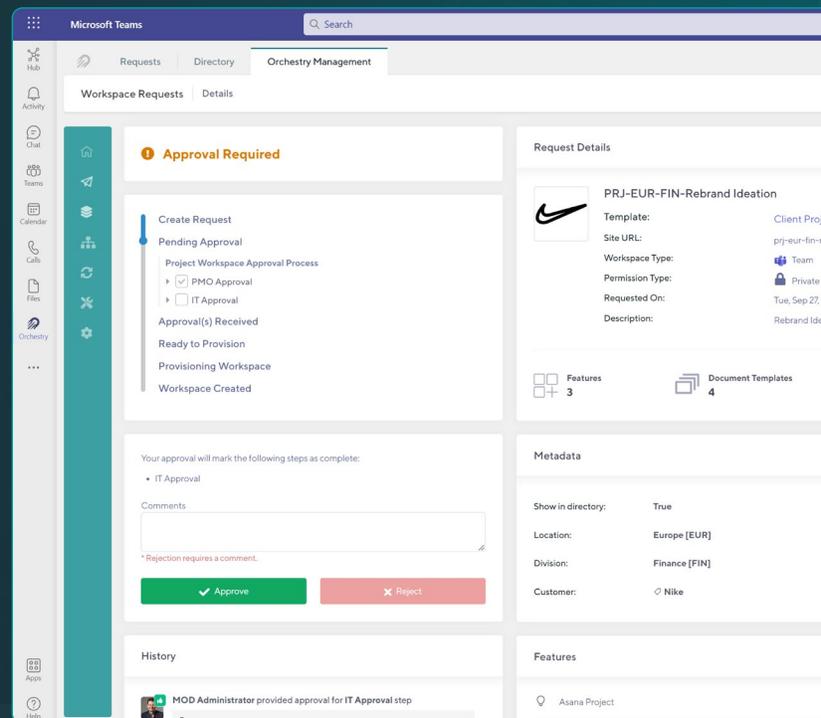

Sit back, relax, and watch Orchestry automatically engage content owners to clean up, organize and govern your tenant.

Govern the creation of Workspaces though a single interface

$15,000

Orchestry users save on average **$15,000 in costs** per Teams/Group/Site template, governance, provisioning and administration.

Orchestry

Ai-Readiness

Cultivate an AI-ready M365 environment with Orchestry's predictive insights and automated governance.

Compliance Assured:

Transition to AI with Orchestry's seamless automated governance and Intelligent Recommendations tailored to your environment, setting a solid foundation for Copilot and future innovations.

AI-ready, cost-efficient

Elevate to Microsoft 365 Copilot readiness with Orchestry. Eliminate oversharing and secure your data landscape efficiently.

Superior readiness, fraction of the cost

Choose Orchestry and bypass the expense of extra M365 licenses required for Copilot readiness.

Secure guest access

Fortify M365 against Guest user risks. Orchestry delivers robust security recommendations, paving the way for safe AI deployment.

Optimized content

Streamline content with Orchestry, ensuring AI compatibility through organized, discoverable data, free from clutter that can cause AI hallucinations.

+80%

Orchestry users **save on average 80% on additional M365 licenses** while leveraging superior functionality to get their tenants ready for AI tools.

Orchestry

Recommendations

Implement best practices, uncover and solve M365 issues BEFORE they happen.

Get expert, data-informed guidance for swift decisions. Orchestry offers direct guidance to efficiently tackle security, storage, and compliance within one interface.

Orchestry

Workspace Review

Simplify Microsoft 365 governance with continuous, automated workspace reviews.

Optimize Your M365 Environment

Detect inactive or misconfigured workspaces and realign them with organizational policies.

Oversight at Scale

Gain a complete view of user access, shared links, ownership gaps, and usage trends.

Get AI-ready

Support Copilot readiness by managing discoverability of confidential content.

Close Security Gaps

Automatically identify and address oversharing, improper permissions, and outdated guest access.

Why Workspace Review?

Feature		
User and guest access reviews	✅	⚠️ Requires E5 or P2
Version history purging and limiting	✅	❌
Automated sensitivity label application	✅	⚠️ Requires E5
Search and Copilot content visibility control	✅	⚠️ Requires SAM

Orchestry

Provisioning

Delight end-users and drive adoption with self-service provisioning of Workspaces.

Orchestry's Provisioning boosts security, governance, and compliance, preparing your environment for Copilot with, Sensitivity Labels, approval workflows, and more. It offers the option to create Workspaces that Microsoft Copilot won't process, ensuring maximum security.

Build or modify Orchestry's pre-built business-first Workspace templates and embed them with security, governance guardrails, and adoption resources.
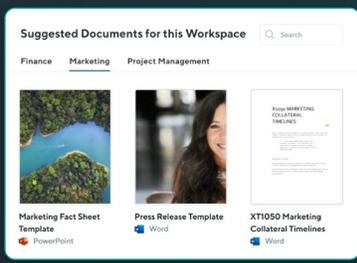

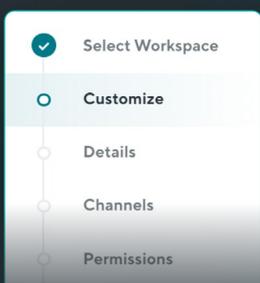

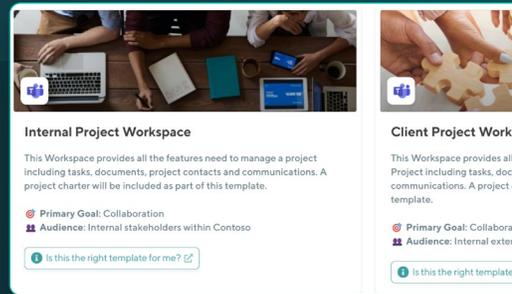

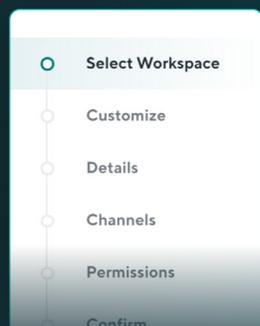

Drive adoption by letting the users create & customize Workspaces in Orchestry's intuitive Workspace Request Wizard with control, but without the endless bottlenecks.

Go beyond out-of-the-box MS Teams templates with support for preconfigured Channels, Tabs, Apps, and more.
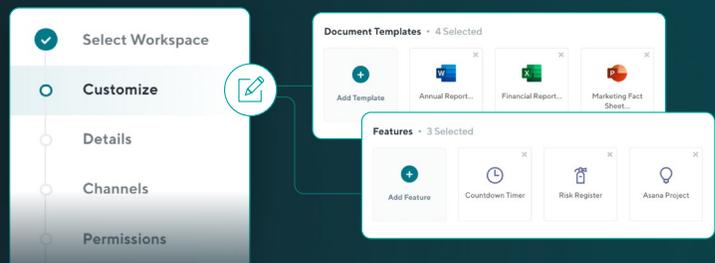

Provide feedback, approve, and govern Workspace requests in a single interface.

Orchestry

Adoption

Eliminate end-user tool confusion and get them EXCITED about using Microsoft 365.

Orchestry optimizes your M365 setup for deploying AI tools like Microsoft Copilot, ensuring users maximize benefits right away. Experience enhanced Copilot adoption and greater returns on your investment in these premium licenses.

Leverage an existing library of business-first scenario templates, or create your own, filled with the right tools for the job, and never hear "what should I use for..." questions from the end-users again.

Allow users to request and customize Workspaces in a streamlined and intuitive step-by-step way, which is bound to delight even the most non-technical users.

Automatically alert users of potential duplication when creating or requesting Workspaces with similar names or metadata to reduce redundancies and frustrations.

Import existing Teams, SharePoint and Communication sites into Orchestry's Informative Workspace directory to make it ridiculously easy for users to browse and quickly access them.

Workspace templates

Become every department and team's IT superhero without the super effort or extra hours.

01

Meet the unique needs of different departments and teams by leveraging a comprehensive library of Orchestry's business scenario templates for Teams, SharePoint and Communication sites created by M365 MVPs and validated by 1000s of real users.

02

Standardize common business processes including employee onboarding and offboarding, inter-departmental communication & collaboration, project management and more with the help of Orchestry's Workspace templates.

03

Save hours and even days of coding and configuration of templates with Orchestry's custom web parts that fill common M365 gaps, including advanced tasks and People web part.

2H

Orchestry users save on average 2 hours setting up each Team or SharePoint site by leveraging pre-built business-first scenario templates.
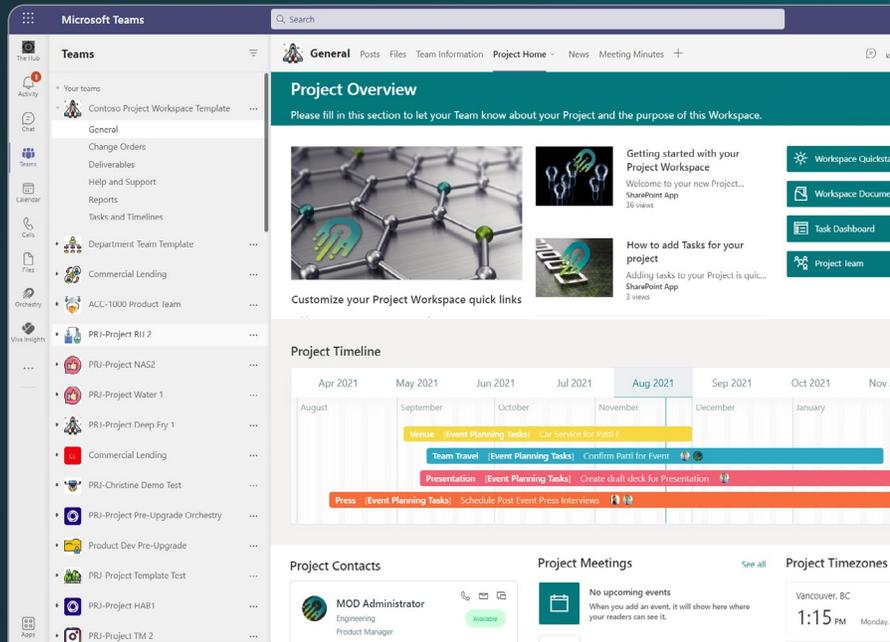

Orchestry

Actionable insights

Understand your entire Microsoft 365 environment.
No scripts or Admin center hopping required.

Review SharePoint and MS Teams usage, activity, lifecycle status, and trends in a beautiful, fast interface with Orchestry.

Identify potential issues like sprawl, data leaks, inactivity and take the right action, at the right time.

Gain specific insights on a Workspace including historical metrics, guest access, sensitivity, applied Policies and much more.

Get direct access to all areas in a Workspace including SharePoint, Teams, Notebooks, Planner, Admin centers and Azure AD.

Orchestry

Guest Management

Gain control over Microsoft 365 Guest Access and get ahead of security risks and issues without the added license costs.

Implement a repeatable Guest review process to ensure compliance, and reduce security risks and issues.

Know everything you need to know about Guests by requiring Workspace Owners to capture additional information, including company name, contact details, manager and even location, before making approval decisions.

Easily access the insights on the full Lifecycle of Guests, from the moment they were invited to the moment it makes sense to remove them, and easily assign periodical Guest reviews to Workspace Owners or a group of users.

Give the Workspace Owners the power to see all guests within a Team, their status, invite redemptions and even resend invites.

$4.5M

Orchestry users **save on average USD$4.35M*** (according to IBM's 2022 Cost of Data Breach Report) **by avoiding security breaches and data leaks.**
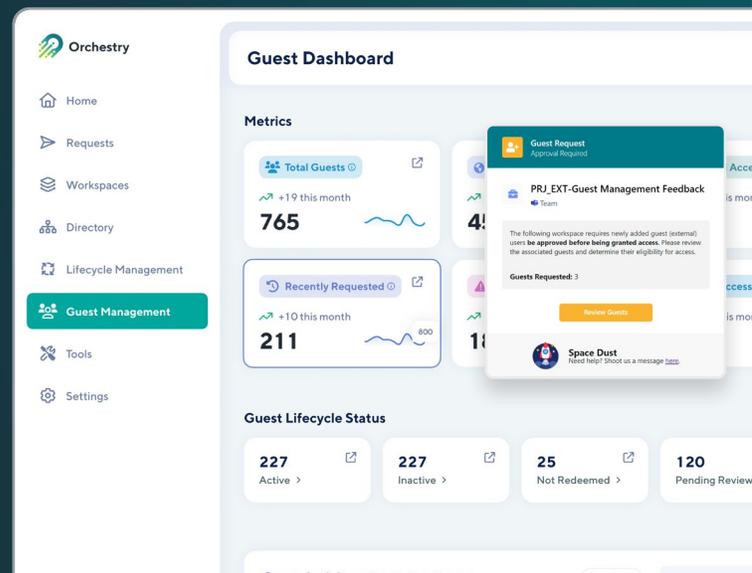

Orchestry

Cleanup

Tame Microsoft 365 sprawl in hours and set course for controlled self-service provision of Microsoft Teams, Groups, SharePoint and Communication sites.

Lift the lid on all existing Teams or SharePoint sites with Orchestry's Actionable Insights to understand usage and identify ones that require deletion or archival.

Save hours by automatically engaging content owners to clean up inactive Teams and add metadata to the actively used Teams and SharePoint sites to improve adoption, findability and reduce further sprawl thanks to Orchestry's Workplace Directory duplication notifications.

Easily generate Workspace templates around specific business processes and enable controlled self-service Workspace provision of Teams, Groups and SharePoint sites.

Set yourself up for future success by defining governance policies around the creation, naming, retention and disposition of Teams, Sites and Groups.

Orchestry's automated archiving streamlines Microsoft Copilot deployment by removing unnecessary content for processing. This, along with version control and deletion, helps reduce AI errors.

Orchestry

Feature	Orchestry	Microsoft	Details
Templating MS Teams Channels	✅	✅	Orchestry fully supports templating of MS Teams Channels, both Private and Public.
Templating MS Teams Tabs	✅	❌	Orchestry's intelligent cloning of MS Teams Tabs includes full configuration across any tab type.
Standardizing Naming Policies	✅	✅	Advanced naming policies are included in Orchestry for MS Teams / SharePoint Online naming, Group Naming and SharePoint URL construction.
Templating Owner and Member Management	✅	❌	Orchestry delivers default owners and members for MS Teams and SharePoint Online to enforce governance.
Workspace Approval Workflows	✅	❌	Orchestry provides the ability to define approval processes for each Workspace type.
Templating Teams Permissions	✅	✅	Orchestry allows defining and copying Team Owner and Member permissions for Teams.
Workspace Targeting	✅	❌	Orchestry enables you to target Workspace templates based on Active Directory groups.
Templating/Provisioning with Custom Metadata	✅	❌	Orchestry provides the ability to create your own organizational metadata that will need to be entered when requesting a Team, Group or Site.
Templating Microsoft Planner	✅	❌	Orchestry delivers full support for any number of plans per group including buckets and tasks.
Templating SharePoint Online	✅	❌	Orchestry provides full support for SharePoint Communication Sites and Team Sites including support for lists, libraries, pages, web parts and other configuration options.
Templating OneNote Files	✅	❌	Orchestry fully supports OneNote files including tabs and sections.
Templating Microsoft Lists	✅	❌	Orchestry delivers full support for any number of Microsoft Lists to be included in Workspace Templates.
Provisioning Governance Policies	✅	✅	Orchestry allows attaching and defining governance policies for Sites and Teams.
Provisioning Suggested Features, Documents, Users and Channels	✅	❌	Orchestry enables suggesting features, documents, users and channels when creating Workspaces.
Templating Custom Features	✅	❌	Orchestry enables defining your own custom features such as SPFx Web Parts, Lists, Libraries or other custom actions.
Templating Custom Document Templates	✅	❌	Orchestry enables you to define and attach document templates to Teams or SharePoint Online Sites.
Workspaces Directory	✅	❌	Orchestry delivers a full directory experience including search, sort and filter for all types of sites in Microsoft 365.
Attach/Assign Custom Metadata	✅	❌	Orchestry enables the ability to define and attach custom metadata to any type of Team, Site or Group (new or existing) in Microsoft 365.
Sensitivity Labels at the Template Level	✅	❌	Orchestry allows you to determine sensitivity labels at the template level and integrate them into the provisioning process.
Filtering Based on Sensitivity Label	✅	❌	The Orchestry Workspace Directory can be filtered on the basis of the sensitivity label applied to each workspace.
Control User Access to Sensitivity Labels	✅	❌	Orchestry enables you to control access of sensitivity labels for end users, allowing you to make only a subset of them available if needed.
Reporting and Insights in One Interface	✅	❌	Orchestry allows you to generate rich reports based on the usage, activity, and policy configuration of workspaces.
Extensive Archive Policies in Microsoft 365	✅	❌	With Orchestry you can do more than archiving, like remediating teams, copy over content and retain information without risking deletion.
Distributed Governance	✅	❌	Orchestry takes the load off IT by involving members and owners of workspace for long-term enforcement of governance policies.
