MODERN SECURITY OPERATIONS
ENVISIONING WORKSHOP

Gain a bird's eye view across your enterprise with SIEM for a modern world.

ENGAGEMENT HIGHLIGHTS

Understand the features and benefits of Microsoft Sentinel and Unified SecOps Platform

Gain visibility into threats across email, identity, endpoints, and non-Microsoft data

Better understand, prioritize, and mitigate potential threat vectors

Create a defined deployment roadmap based on your environment and goals

As IT becomes more strategic, the importance of security grows daily. Security information and event management (SIEM) solutions built for yesterday's environments struggle to keep pace with today's challenges—let alone tomorrow's unimagined risks.

That's why Microsoft developed Microsoft Sentinel, a fully cloud-native SIEM solution.

With everything running through Microsoft Sentinel, we've reduced the time spent on case management and resolution of alerts by approximately 50 percent."

–**Stuart Gregg,** Cyber Security Operations Lead, ASOS

See and stop threats before they cause harm by engaging in a Modern SecOps Envisioning Workshop.

Get a birds-eye view across all data ingested and detect threats using Microsoft's analytics and threat intelligence. Investigate potential risks with artificial intelligence and hunt for suspicious activities.

A FLEXIBLE ENGAGEMENT

Using a modular approach, we allow you to customize the engagement to meet your specific security operations needs.

Threat Exploration

If your organization is interested in learning how to integrate Microsoft Sentinel in your existing SOC by replacing or augmenting an existing SIEM, we will work with your SecOps team and provide additional readiness to bring them up to speed.

Remote Monitoring (optional)

If your organization doesn't have its own security operations center (SOC) or if you want to offload some monitoring tasks, we will demonstrate how Apex Digital Solutions can perform remote monitoring and threat hunting for you.

WHAT WE'LL DO

▶ **Analyze customer's** requirements and priorities for a SIEM deployment and define Customer's Success Criteria

▶ **Define scope & deploy** Microsoft Sentinel in the production environment integrating with Microsoft and non-Microsoft solutions

▶ **Remote monitoring** of Microsoft Sentinel incidents and proactive threat hunting to discover attack indicators

▶ **Discover threats** to on-premises and cloud environments across email, identity, endpoints, and third-party data

▶ **Recommend next steps** on how to proceed with a production implementation of Microsoft Sentinel and the Unified SecOps Platform
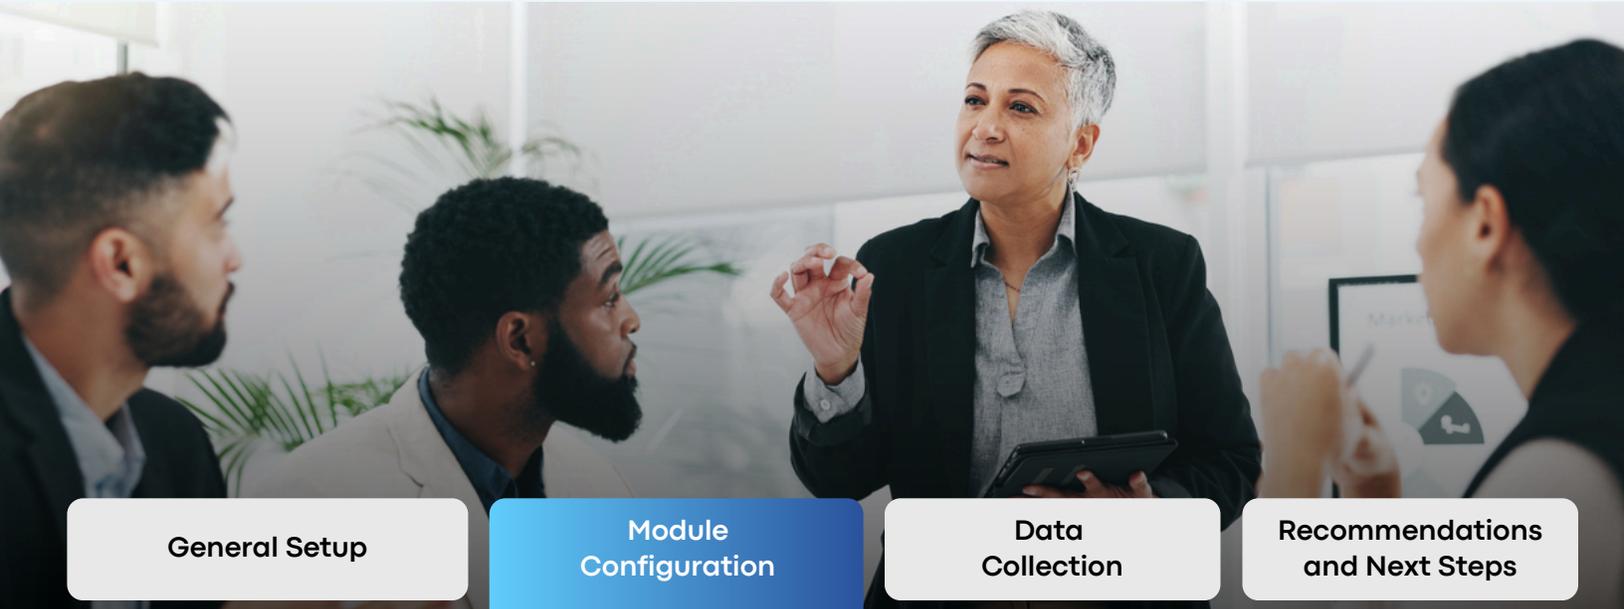

General Setup	Module Configuration	Data Collection	Recommendations and Next Steps

Mandatory Modules

▶ Microsoft Defender XDR/Unified SecOps
▶ Identify Threat Detection
▶ Communication and Collaboration Threat Detection
▶ Azure Threat Detection
▶ Threat Intelligence

Optional Modules (select at least one)

▶ Server Threat Detection
▶ Third-Party Alert/Logs
▶ SOC Automation
▶ Sentinel Cost Estimation
▶ Data Ingestion and Retention

WHY APEX DIGITAL SOLUTIONS?

When it comes to security, you need an experienced partner.

Apex Digital is a Microsoft Solutions Partner with deep expertise in Microsoft Security. We help organizations identify risks, strengthen defenses, and build smart technology strategies that keep teams secure, productive, and engaged—so they can stay focused on what they do best.
