COPILOT + POWER PLATFORM ENVISIONING AND PROOF OF CONCEPT

Chart your path to Microsoft 365 Copilot, agents, and the Power Platform. Go from first look to a working proof of concept.

ENGAGEMENT HIGHLIGHTS

- See what's possible with Microsoft 365 Copilot, agents, and the Power Platform
- Discover and prioritize the highest-value scenarios for your business
- Validate security, governance, and readiness before you invest
- Walk away with a proof of concept and an initial business case

Not sure where to start with Copilot, agents, or the Power Platform?

Every organization is at a different point on its AI journey. This engagement meets you wherever you are, with five flexible delivery pathways that move from inspiration and assessment to design and a hands-on proof of concept.

A FLEXIBLE, FOUR-STAGE DELIVERY MODEL

Each pathway draws on the stages that fit your starting point and goals:

1 INSPIRE

Product overviews, demos, customer stories, and the Microsoft Scenario Library to show what's possible

2 ASSESS

Scenario discovery, readiness reviews, and security/oversharing assessments to size the opportunity and risk

3 DESIGN

Solution definition, an initial business case, value-realization and adoption roadmaps, plus an executive summary

4 PROOF OF CONCEPT

Prepare the environment, enable trials, build a working agent or solution, train users, and measure results

FIVE DELIVERY PATHWAYS

Choose the pathway that fits your goals.

1

PATHWAY 1

COPILOT ENVISIONING

Best for organizations new to AI that want a full envisioning workshop. It runs from understanding what's possible with Microsoft 365 Copilot, through scenario discovery, to an initial business case that justifies the investment.

FOCUS: ENVISIONING ONLY

STAGES COVERED

- Inspire
- Assess
- Design
- ~~PoC~~

2

PATHWAY 2

TECHNICAL & SECURITY READINESS FOR COPILOT

Best for organizations with security or governance concerns who need to understand how to secure and govern Microsoft 365. It covers readiness and oversharing assessments and remediation planning before you invest in Copilot.

FOCUS: SECURITY-FOCUSED

STAGES COVERED

- Inspire
- Assess
- Design
- ~~PoC~~

3

PATHWAY 3

COPILOT + AGENTS PROOF OF CONCEPT

Best for organizations that have already seen Copilot and agents and are ready to jump in. It covers a readiness review, scope definition, and building your first proof-of-concept agent with hands-on guidance.

FOCUS: STARTS AT ASSESS

STAGES COVERED

- ~~Inspire~~
- Assess
- Design
- PoC

4

PATHWAY 4

POWER PLATFORM ENVISIONING

Best for organizations that understand the Power Platform and want to define the path forward. It covers adoption assessments and builds a business case and value-realization plan, so you are ready to deliver business value before implementation.

FOCUS: SOLUTION ENVISIONING

STAGES COVERED

- ~~Inspire~~
- Assess
- Design
- ~~PoC~~

5

PATHWAY 5

POWER PLATFORM PROOF OF CONCEPT

Best for organizations committed to the Power Platform for low-code development who want to build initial solutions for review and feedback. It covers scope and requirements, environment setup, and delivery of a working proof of concept.

FOCUS: BUILD & VALIDATE

STAGES COVERED

- ~~Inspire~~
- ~~Assess~~
- Design
- PoC

WHO SHOULD ATTEND

This engagement is designed for business and technology leaders shaping their AI and low-code strategy, including:

- Business & technology decision-makers (CIO/CTO)
- IT & Microsoft 365 administrators
- Security, compliance, & governance leads
- App development & automation leads
- Data & productivity stakeholders
- Adoption & change management leads

WHY APEX DIGITAL SOLUTIONS?

When it comes to AI and security, you need an experienced partner.

Apex Digital is a Microsoft Solutions Partner with deep expertise across Microsoft 365 Security, Copilot, agents, and the Power Platform. We help organizations turn AI potential into high-impact business cases, so teams stay secure, productive, and focused on what they do best.
